PROFESSIONAL SUMMARY

I am a MERN developer with 1 year of experience working with React.js. I have strong front-end development skills and a good understanding of the MERN stack to build user-friendly web applications. I enjoy writing clean and efficient code and always try to improve my skills to contribute better to development team.

TECH STACK

HTML	Context API	Mongo DB
CSS (Tailwind CSS)	Node Js	Git & GitHub,
React	Express Js	Insomnia API

PROFESSIONAL EXPERIENCE

Great Idea Tech - Palanpur

July 2024 - Present

React Developer

Developed user-friendly interfaces and interactive components using React.js. Built React applications with Context API efficient state management. Integrated APIs for dynamic data handling with error management. Optimized complex state management using Context API for seamless interactions.

PROJECTS

Art Foundation Website (React + Framer Motion + Google API + Calendar API)

Designed and developed a responsive website for an art foundation using React.js and Framer Motion for interactive UI and smooth animations. Integrated Google Sign-In authentication using OAuth 2.0 for secure user login. Connected Google Calendar API to fetch and display event schedules dynamically on the frontend. Implemented calendar-based event booking and management system synced with the foundation's Google Calendar. Ensured a modern, mobile-friendly UI with smooth scroll-based animations and fast loading performance.

You Only Younger (React + Tailwind CSS)

Designed and developed a responsive website for an art foundation using React.js and Tailwind Css for interactive UI and smooth animations. The project showcases an Integrative Medicine Center with a focus on holistic and functional health treatments. It highlights solutions for issues like anxiety, depression, chronic pain, and low energy. The content is designed to emphasize natural healing over conventional side effects. Built with a clear, empathetic, and user-friendly structure to present the brand's mission.
